

Stay cyber safe

Protect our community

When we're online, we need to keep ourselves safe.

Online viruses and scams mean we need to take steps to protect our money and personal information.

When you use the internet, make sure you...

Always

- Have a password: long, strong and unique.
- Log out or lock all devices when you aren't using them.
- Know where your phone, computer or tablet is.
- Use two-factor authentication.
- Keep your phone, apps and anti-virus software updated.

Never

- Share passwords.
- Click on funny-looking links or reply to strangers.
- Trust someone offering you a quick way to make money.
- Use banking or shopping websites and apps on public Wi-Fi networks.

Only

- Download from trusted, known sources, like your phone's official app store.
- Connect to secure Wi-Fi networks.

Trust yourself

If it looks too good to be true, it probably is.
If it looks suspicious, it probably is.
