**UPSIZE**

**YOUR PASSWORDS**

**So they're long, strong  
and hard to crack**

[PACSON.ORG/CYBER-SMART-PACIFIC](https://PACSON.ORG/CYBER-SMART-PACIFIC)

Long, strong and unique passwords are much harder for attackers to crack. Try creating a passphrase that's a string of four or more words, this is much stronger than a random mix of letters, numbers and symbols.

**UPGRADE**

**TO TWO-FACTOR  
AUTHENTICATION**

**So your online accounts  
have double protection**

[PACSON.ORG/CYBER-SMART-PACIFIC](https://PACSON.ORG/CYBER-SMART-PACIFIC)

Enable two-factor authentication (2FA) for your online accounts by turning it on in privacy settings. When you next log in you'll use a second step such as your thumbprint, facial ID or one time code from an app to verify it's really you.

**UPDATE**

**YOUR APPS  
AND SOFTWARE**

**To keep bugs and  
viruses out**

[PACSON.ORG/CYBER-SMART-PACIFIC](https://PACSON.ORG/CYBER-SMART-PACIFIC)

As well as providing new features, updates also fix security risks that attackers can use to gain access to your personal information. Ensure automatic updates are enabled on all your devices to keep yourself secure.

**YOUR DATA SECURITY**

**To protect against  
unauthorised access**

[PACSON.ORG/CYBER-SMART-PACIFIC](https://PACSON.ORG/CYBER-SMART-PACIFIC)

Security measures like firewalls and permission-based controls provide protection to your business from cyber threats and unauthorised access. Regularly review and update your security measures and educate staff about cyber security steps.
